

QUALITY AND SERVICE

Who are we?

Fürst Medical Laboratory is a Norwegian-owned laboratory founded in 1950 by Dr. Valentin Fürst.

Our laboratory performs analyses on behalf of the public sector and has grown to become the largest medical laboratory in the Nordic region.

Fürst receive and analyse approximately 12.000 samples daily at our laboratory located in Oslo.

Our goal is to offer a wide and relevant range of analyses, have the best availability of medical expertise and offer the best IT solutions for doctors and patients.

Where are we?

Fürst's main laboratory is located at Furuset in Oslo. We have our own blood sampling centres in Oslo, Sandefjord and Bergen. Our phlebotomists will additionally travel to several nursing homes by agreement with the municipalities. In some areas we can also offer blood sampling in the patients' home.

Our subject areas

Fürst offers analyses in medical biochemistry, clinical pharmacology, medical microbiology and pathology. The laboratory is accredited in all these areas (ISO-15189).

Our laboratory executes a great range of analysis. You will find a detailed overview at www.furst.no/analyse-og-klinikk

Who Fürst is for

Fürst is first and foremost a laboratory for primary care, and our services are mostly used by general practitioners. In addition, a number of specialists, institutions, dentists, occupational health services also use Fürst as their preferred laboratory.

Our laboratory services are used by doctors all over the country.
